Risk of Death or Acute Myocardial Infarction 10 Years after Coronary Artery Bypass Surgery in Relation to Type of Diabetes T. Alserius, et al. Am Heart J (2006) 152;599-605

Comparison of Effectiveness of Coronary Artery Bypass Grafting Versus Percutaneous Coronary Intervention in Patients with Ischemic Cardiomyopathy P. Buszman, et al. Am J Cardiol (2007) 99;36-41

Clinical End Point Definitions after Percutaneous Coronary Intervention and Their Relationship to Late Mortality: An Assessment by Attributable Risk D. P. Chew, et al. Heart (2006) 92;945-50

Concurrent Implantation of Sirolimus- and Paclitaxel-Eluting Stents in the Same Vessel

Effect of Pexelizumab on Mortality in Patients with Acute Myocardial Infarction or Undergoing Coronary Artery Bypass Surgery: A Systematic Overview K. W. Mahaffey,

Challenges in Predicting the Need for Coronary Artery Bypass Grafting at Presentation in Patients with Non-St-Segment Elevation Acute Coronary Syndromes R. H. Mehta, et al. Am J Cardiol (2006) 98;624-7

Comparison between Coronary Angioplasty and Coronary Artery Bypass Surgery for the Treatment of Unprotected Left Main Coronary Artery Stenosis (the Bologna Registry) T. Palmerini, et al. Am J Cardiol (2006) 98;54-9

Interventional Versus Conservative Treatment in Acute Non-St Elevation Coronary Syndrome: Time Course of Patient Management and Disease Events over One Year in the Rita 3 Trial

Rescue Percutaneous Coronary Intervention Early after Coronary Artery Bypass Grafting in the Drug-Eluting Stent Era

Outcome after Redo Coronary Artery Bypass Grafting in Patients with Ischaemic Cardiomyopathy and Viable Myocardium

Occurrence and Risk Factors for Reintervention after Coronary Artery Bypass Grafting

Comparison of Functional Status after Coronary Artery Bypass Grafting in Patients with and without Diabetes Mellitus

Treatment of Coronary in-Stent Restenosis with a Paclitaxel-Coated Balloon Catheter

In Unstable Angina or Non-St-Segment Acute Coronary Syndrome, Should Patients with Multivessel Coronary Artery Disease Undergo Multivessel or Culprit-Only Stenting?

Coronary Revascularization (Surgical or Percutaneous) Decreases Mortality after the First Year in Diabetic Subjects but Not in Nondiabetic Subjects with Multivessel Disease: An Analysis from the Medicine, Angioplasty, or Surgery Study (Mass Ii)

Cost-Effectiveness of Coronary Artery Bypass Grafts Versus Percutaneous Coronary Intervention for Revascularization of High-Risk Patients

Coronary Septal Collaterals as an Access for the Retrograde Approach in the Percutaneous Treatment of Coronary Chronic Total Occlusions

St-Segment Recovery and Prognosis in Patients with St-Elevation Myocardial Infarction Reperfused by Prehospital Combination Fibrinolysis, Prehospital Initiated Facilitated Percutaneous Coronary Intervention, or Primary Percutaneous Coronary Intervention H. Thiele, et al. Am J Cardiol (2006) 98;1132-9

St-Segment Recovery and Prognosis in Patients with St-Elevation Myocardial Infarction Reperfused by Prehospital Combination Fibrinolysis, Prehospital Initiated Facilitated Percutaneous Coronary Intervention, or Primary Percutaneous Coronary Intervention H. Thiele, et al. Am J Cardiol (2006) 98;1132-9

Usefulness of Preoperative C-Reactive Protein and Soluble Intercellular Adhesion Molecule-1 Level for Predicting Future Cardiovascular Events after Coronary Artery Bypass Grafting P. van der Harst, et al. Am J Cardiol (2006) 97;1697-701

The Impact of Age on Outcomes after Coronary Artery Bypass Surgery Versus Stent-Assisted Percutaneous Coronary Intervention: One-Year Results from the Stent or Surgery (Sos) Trial Z. Zhang, et al. Am Heart J (2006) 152;1153-60
