

The Significance of Circulating Levels of Both Cardiac Troponin I and High Sensitivity C Reactive Protein for the Prediction of Intravenous Thrombolysis Outcome in Patients with St-Segment Elevation Myocardial Infarction S. G. Foussas, et al. Heart (2007)

Long-Term Prognostic Significance of High-Sensitivity C-Reactive Protein before and after Coronary Angioplasty in Patients with Stable Angina Pectoris O. Gach, et al. Am J

Comparison of Effects of Bare Metal Versus Drug-Eluting Stent Implantation on Biomarker Levels Following Percutaneous Coronary Intervention for Non-St-Elevation Acute Coronary Syndrome C. M. Gibson, et al. Am J Cardiol (2006) 97;1473-7

Preprocedural C-Reactive Protein Levels Predict Myocardial Necrosis after Successful Coronary Stenting in Patients with Stable Angina A. Goldberg, et al. Am Heart J (2006) 151;1265-70

Relation between Lipoprotein(a) and Fibrinogen and Serial Intravascular Ultrasound Plaque Progression in Left Main Coronary Arteries M. Hartmann, et al. J Am Coll
Cardiol (2006) 48;446-52

Time Course of C-Reactive Protein Reduction with Simvastatin Therapy in Patients with Type 2 Diabetes Mellitus T. L. Hernandez, et al. Am J Cardiol (2006) 98;1656-9

Relation of C-Reactive Protein Level and Long-Term Risk of Death or Myocardial
Infarction Following Percutaneous Coronary Intervention with a Sirolimus-Eluting Stent

Relation of C-Reactive Protein Level and Long-Term Risk of Death or Myocardial Infarction Following Percutaneous Coronary Intervention with a Sirolimus-Eluting Stent

Optimizing Use of Revascularization and Clinical Outcomes in St-Elevation Myocardial Infarction: Insights from the Gusto-V Trial

The Impact of the Esc/Acc Redefinition of Myocardial Infarction and New Sensitive Troponin Assays on the Frequency of Acute Myocardial Infarction

Limiting Myocardial Damage During Acute Myocardial Infarction by Inhibiting C-Reactive Protein

Serum Concentrations of Adiponectin and Risk of Type 2 Diabetes Mellitus and Coronary Heart Disease in Apparently Healthy Middle-Aged Men: Results from the 18-Year Follow-up of a Large Cohort from Southern Germany

Combined Prognostic Utility of St Segment in Lead Avr and Troponin T on Admission in Non-St-Segment Elevation Acute Coronary Syndromes

Frequency of Sudden Cardiac Death among Acute Myocardial Infarction Survivors with Optimized Medical and Revascularization Therapy T. H. Makikallio, et al. Am J Cardiol (2006) 97;480-4

Significance of Total and Differential Leucocyte Count in Patients with Acute Myocardial Infarction Treated with Primary Coronary Angioplasty M. Mariani, et al. Eur Heart J (2006) 27;2511-5

Impact of Percutaneous Coronary Intervention on the Levels of Interleukin-6 and C-Reactive Protein in the Coronary Circulation of Subjects with Coronary Artery Disease M. M. Ramadan, et al. Am J Cardiol (2006) 98;915-7

Association of Hemoglobin a(1c) Level with the Severity of Coronary Artery Disease in Patients with Diabetes Mellitus G. Ravipati, et al. Am J Cardiol (2006) 97;968-9

Comparison of B-Type Natriuretic Peptides for Assessment of Cardiac Function and Prognosis in Stable Ischemic Heart Disease M. Richards, et al. J Am Coll Cardiol (2006) 47;52-60

Usefulness of Preprocedural Serum N-Terminal Pro-Brain Natriuretic Peptide Levels to Predict Long-Term Outcome after Percutaneous Coronary Intervention in Patients with Normal Troponin T Levels N. Saleh, et al. Am J Cardiol (2006) 97;830-4

B-Type Natriuretic Peptide and the Risk of Cardiovascular Events and Death in Patients with Stable Angina: Results from the Atherogene Study R. Schnabel, et al. J Am Coll Cardiol (2006) 47;552-8

Cardiac Troponin T at 96 Hours after Acute Myocardial Infarction Correlates with Infarct Size and Cardiac Function H. Steen, et al. J Am Coll Cardiol (2006) 48;2192-4

Oxidized Phospholipids Predict the Presence and Progression of Carotid and Femoral Atherosclerosis and Symptomatic Cardiovascular Disease: Five-Year Prospective Results from the Bruneck Study S. Tsimikas, et al. J Am Coll Cardiol (2006) 47;2219-28

Usefulness of Preprocedural Soluble Cd40 Ligand for Predicting Restenosis after Percutaneous Coronary Intervention in Patients with Stable Coronary Artery Disease S. Turker, et al. Am J Cardiol (2006) 97;198-202

Usefulness of Preoperative C-Reactive Protein and Soluble Intercellular Adhesion Molecule-1 Level for Predicting Future Cardiovascular Events after Coronary Artery Bypass Grafting P. van der Harst, et al. Am J Cardiol (2006) 97;1697-701

Vkorc1 Haplotypes Are Associated with Arterial Vascular Diseases (Stroke, Coronary Heart Disease, and Aortic Dissection) Y. Wang, et al. Circulation (2006) 113;1615-21

Short- and Long-Term Risk Stratification in Acute Coronary Syndromes: The Added Value of Quantitative St-Segment Depression and Multiple Biomarkers C. M.
Integration of B-Type Natriuretic Peptide Levels with Clinical Data and Exercise Testing for Predicting Coronary Artery Disease T. Wolber, et al. Am J Cardiol (2006) 98;764-7
Troponin I as a Predictor of Coronary Heart Disease and Mortality in 70-Year-Old Men: A Community-Based Cohort Study B. Zethelius, et al. Circulation (2006) 113;1071-8
